testimonials

“SIS have undertaken a number of projects involving restrictions on time, dates, access and security. SIS were able to complete work on time and budget with high quality, an essential combination when working for Real Madrid. I am pleased to say all works met our high standards and a great deal of thanks must go to all involved in the SIS project team.”

Paul Burgess, Head Groundsman - Real Madrid

“We have been absolutely delighted with the new pitch. SIS were a pleasure to work with throughout the installation, and subsequently during the ‘after sales’ support provision. They were professional in their approach to the project, flexible to requests from the University and have dealt with any minor issues in a timely fashion.”

Dan Lewis, Deputy Director of Sport - Durham University

“The experience of SIS returfing technique in the Amsterdam ArenA makes optimal multi-functional use of our venue possible, while ensuring an excellent playing surface for AFC Ajax at any moment.”

Henk van Raan, Facilities Manager - Amsterdam Arena

SIS - service

Quality - Our experienced personnel work with our state of the art equipment ensuring that we provide a quality product across the Globe.

Manufacture - Our sports turf factory in Cumbria is the UK's oldest established manufacturing plant specialising in the production of synthetic surface. We are ISO 9001 certified.

One Solution - We offer one simple solution! The construction of natural and synthetic pitches, from a greenfield site to the refurbishment of an existing surface, our services include groundwork, civils, fencing, shockpads, surfacing systems, floodlighting and the connection of services.

Service - we are well known throughout our industry, all our team are customer focused and we deliver excellent customer service.

Success - we deliver successful conclusions to all our projects. We are rightfully proud of the wide range of high quality sport and leisure surfaces that we can provide to a wide variety of sports.

Construction

Maintenance

“SIS really understand synthetic turf and respond at short notice with a professional approach. They are clearly experts, offering a full design and build package. SIS's small-sided football systems have, over time, demonstrated durability, functionality and ease of maintenance.”

Sean Tracey, CEO - Powerleague Fives Ltd

Support in Sport

...one simple solution

Support in Sport (SIS) Group construct sports surfaces for some of the greatest names in sport.

We are a world leader in synthetic and natural sports surfacing. We design, manufacture and construct sports surfaces for a wide range of sporting venues ranging from international stadiums to community projects. We have many years experience in delivering projects not only to some of the greatest names in sport but also to schools, colleges, universities, sports clubs and local authorities.

We manufacture a wide range of synthetic turf in our purpose built factory, whilst we harvest natural turf from farms throughout Europe.

Our services include:

- The complete package from concept to post installation support
- Project consultation, design and construction
- Site evaluation and a flexible choice of solutions
- Installation by our own staff and equipment
- Management of pitch maintenance contracts

* SIS are proud to have installed pitches at 5 stadiums which have been chosen as venues for the UEFA Champions League Final.

Residential

SIS offer a complete range of synthetic turf for the sport & leisure industry meeting the highest performance standards and producing bespoke solutions.

SIS advanced manufacturing process, coupled with expert knowledge of the latest fibre technology enables great surfaces to be produced.

- Variety of pile heights ranging from 9mm - 80mm
- Third Generation (3G) long pile surfaces - monofilament & fibrillated yarns
- Sand filled surfaces - polypropylene and polyethylene
- Sand dressed surfaces - low sliding resistance polyethylene & polypropylene

Making the correct decision!

Our experienced team will assist you in this process, offering initial advice, discussing funding initiatives, site viability and cost evaluation before finally supplying and installing the correct surface for your sporting requirements.

Simple questions to ask before making a decision:

- How many hours of daily play do I require?
- What sports do I wish to play on the surface?
- What standard of play is required?
- How will the surface be funded?

framework

SIS are part of a framework agreement to provide the design, manufacture, installation and maintenance of artificial grass pitches. The agreement is in support of the Rugby Football Union (RFU), Football Association (FA) and Football Foundation (FF) capital investment programmes.

Synthetic Football Turf

SIS football surfaces includes the very latest third generation (3G) long pile turf in monofilament and fibrillated yarns or sand filled and sand dressed surfaces. Offering outstanding playing characteristics and providing a 'natural looking' durable surface.

Extensive experience in constructing pitches throughout the world has enabled SIS to offer a product range that has been fine tuned to meet the exact requirements of the sport. We have completed detailed research in this field having for many years, consulted with leading industry experts, professional players and top football coaches.

Synthetic Rugby Turf

Our latest third generation (3G) long pile synthetic surfaces meet the rigorous demands of this high impact sport. Using a unique combination of fibres, our surfaces offer increased performance and provide excellent playing characteristics.

SIS have developed a range of quality products which meet the requirements of the International Rugby Board (IRB).

Synthetic Hockey Turf

The SIS range of hockey surfaces include specifications for sand dressed, sand filled and wet turf systems. Developed over many years our consistent player friendly surfaces promote low abrasion, offer low slide resistance, uniform traction, and provide an ideal ball bounce. All are approved by the International Hockey Federation (FIH).

Synthetic Multisport Turf

Synthetic turf for 'Multi Use Games Areas' (MUGAs) provide a surface that is suitable for a variety of community needs.

Frequently, a lack of budget or shortage of available land may not allow for a specific sport synthetic pitch to be constructed, therefore a MUGA can be the ideal cost effective solution. SIS has developed a range of surfaces which will allow a variety of sports to be played.

The 'Synergique' Football / Hockey Turf

To cater for clubs and schools who wish to combine hockey and football, SIS has developed the 'Synergique' product range.

This unique surface is manufactured from a combination of fibres to meet the playing characteristics required for both football and hockey.

Synthetic Gaelic Sports Turf

Due to Irelands wet climate natural turf 'Gaelic Sports' pitches often suffer severe wear and tear. The SIS development team, many who play Gaelic Sports, have produced a bespoke product to meet the requirements of both the inclement weather and Gaelic Sports.

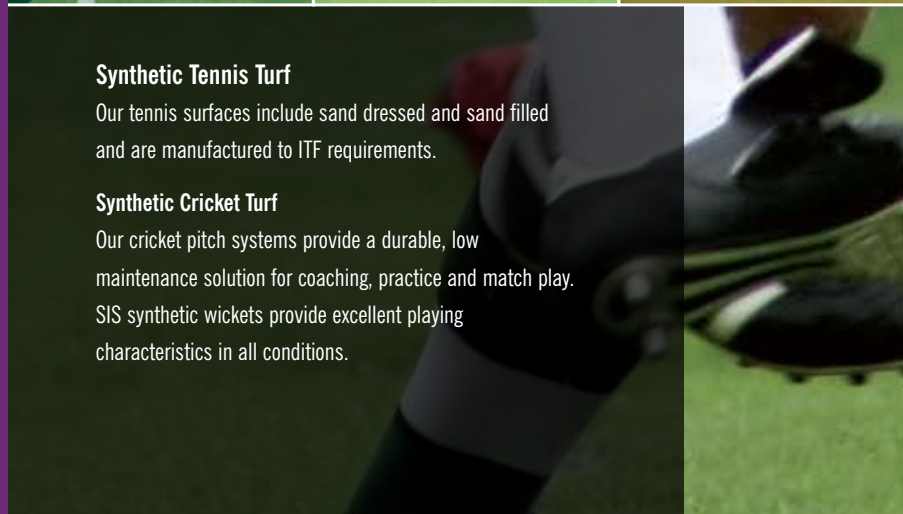

Synthetic Tennis Turf

Our tennis surfaces include sand dressed and sand filled and are manufactured to ITF requirements.

Synthetic Cricket Turf

Our cricket pitch systems provide a durable, low maintenance solution for coaching, practice and match play. SIS synthetic wickets provide excellent playing characteristics in all conditions.

natural turf

Natural Turf Surfaces

SIS has gained an enviable reputation for the design and installation of natural turf sports pitches, and the returfing of existing pitches.

Pitch returfing with natural turf in today's stadia is a complex process, it demands a complete understanding of the sporting environment. At SIS we believe that it is essential to utilise the correct equipment to ensure the turf survives both pre, during and post installation, and that the finished surface delivers the required prestigious result.

SIS - pitches

experience

SIS has been selected to install pitches throughout the world, just some of the prestigious sporting events that have taken place on our pitches include:

World Cup Finals

African Cup of Nations

European Champions League

Heineken Cup Rugby

6 Nations Rugby

Natural Turf Sports Pitches by the market leader!

At SIS we provide the complete package from initial design and construction through to project management and pitch maintenance. Our unique natural turf systems are installed by our own trained and experienced personnel using the latest specialised equipment.

Experience allows SIS to provide a unique service:

- SIS grow natural turf on farms across Europe - allowing us to offer bespoke pitch installations across the world
- SIS remove and install turf using the latest specialist low pressure machinery - ensuring minimal damage
- Quality control is assured throughout the whole operation by using only our own highly skilled personnel
